

First, touch this green button, labeled 'Phone Call' →

Do NOT use this blue button; it's ← for official use only.

Then, after you've touched the green 'Phone Call' button, you will see this screen:

Black reader for scanning ← access cards.

Next, touching this 'Find a Name' bar takes you to the alphabetical community directory; once the name is found, just touch the resident's name and the system will call their phone.

If someone has a code, they will touch this bar, and a keypad will appear. When they enter the 4-digit code, it calls the resident's phone, allowing the resident to grant or deny access.

'Quick Call - Office' → is not functional and will be removed from the screen shortly.
